## PROJECTS

**Air-Bnb Website Design**

- An Online marketplace that connects people who want to rent out their homes for short-and-long-term homestays. It easy for travelers to find unique place to stay .
- **Project links :** <https://github.com/Sami-a528/ProjectAirbnb>

**Binkeyit Website Design**

- It is to allow customers to browse products, place orders online, and track deliveries. It offers a wide range of everyday products across multiple categories including groceries, fresh produce, personal care, home items, and more, which are delivered to the customer
- Users can search for items such as vegetables, fruits, snacks, packaged foods, toiletries, and household essentials etc directly through the website. Customers can create accounts, save addresses, use multiple payment options like UPI, credit/debit cards, wallets, or Cash On Delivery (COD), and manage order history on the Binkeyit platform.
